About Us

We at Pulumi are reimagining how develolpers and infrastructure teams program the cloud. We believe in empowering every builder to build modern cloud software, with more collaboration and fun.

We are remote-first, and we are hiring!

Our Values

Work as a Team

We work together and celebrate our successes together early and often.

Be Inclusive

We are a global and inclusive team with a diverse set of perspectives.

Be Customer Driven

We wear the customer's shoes. When a customer is successful, we are too.

Lead with Openness

We are transparent, open, and honest with ourselves and with our customers.

Bias for Action

We say yes more than we say no. Good today is better than perfect tomorrow. When in doubt, we experiment.

Always Be Learning

We are intellectually curious lifelong learners about technology, our customers, and the world around us.
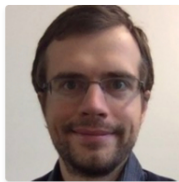

Think Big

We are big dreamers, a bit rebellious, and reject status quo. We hire the best people and empower them to invent the future.

Like what we stand for? Join us.

We are always looking for new teammates who want to build the future together. **Learn more**.

Meet the Team

Anton Tayanovskyy
Software Engineer

Phillip Edwards
Customer Engineer

Robby Parker
Account Executive

Isaac Harris
Head of Business Development

Laura Santamaria
Developer Advocate

Liqin Mo
Director of Finance
